SUMMARY

Results-driven Computer Science graduate with strong skills in Java, JavaScript, React.js, Node.js, MongoDB, MySQL, and full-stack web development. Experienced in designing and developing scalable web applications, responsive user interfaces, RESTful APIs, and database-driven solutions through academic and personal projects. Proficient in data structures, problem solving, object-oriented programming, Git, and modern development tools. Quick learner with a passion for building efficient, user-friendly software solutions. Seeking an opportunity as a Software Engineer / Full Stack Developer to contribute technical expertise and grow in a dynamic organization.

Projects

Cloud - Based Real -Time Video Streaming with Adaptive Bitrate Optimization

January 2025 - May 2025

Developed a cloud - based real - time video streaming system with adaptive bitrate optimization for seamless playback.

- Developed a cloud - based real - time video streaming system with adaptive bitrate optimization for seamless playback.
- Implemented Adaptive bitrate streaming (ABR) algorithms to dynamically adjust video quality based on network conditions.
- Designed a scalable architecture leveraging CDNs, cloud storage, and edge computing for low - latency streaming.

Music Genres Classification using KNN System

August 2024 - December 2024

- Developed an AI - powered system for classifying music tracks into different genres based on their audio features.
- Built a Django - based web application with a user - friendly interface for genre classification.

Designed and implemented an e - commerce platform supporting 1,000+ concurrent users, reducing page load times by 35%, and

January 2024 - July 2024

- Enhanced user engagement by designing and implementing a responsive UI featuring dynamic product filters, search functionality, personalized recommendations, and mobile - friendly navigation, resulting in a 28% increase in user satisfaction based in in
- Developed a comprehensive admin panel enabling streamlined inventory control, order tracking, and performance analytics to
- Enhance overall store management efficiency.

Developed a responsive web application that provides real - time patient record access and automated appointment scheduling

January 2023 - July 2023

- Streamlined medical record management processes, enhancing organization and contributing to improved patient care outcomes.
- Facilitated seamless communication between patients, doctors, and hospital staff by leveraging scheduling software and structured handoff protocols, resulting in improved service efficiency and patient satisfaction.

Deliver real - time and forecasted weather data through a user - friendly dashboard that enables quick access to location - based

January 2023 - July 2023

- Weather updates and customizable alerts.
- Implement interactive visualizations for weather trends and insights.

EDUCATION

Bachelor's in Computer Science & Engineering
CHANDIGARH UNIVERSITY

June 2026

Diploma in Electrical Engineering
Government Polytechnic Jehanabad

June 2022

10th
DAV Public School, C.R.R.C, Medical Road Gaya, Bihar 823001

March 2019

CERTIFICATES

Introduction to Web Development with HTML, CSS, JavaScript

Principles of UX/UI Design

Mobile Development and JavaScript

Data Structures and Performance

SKILLS

Programming Languages:

JavaScript, Java, Python, SQL

Frontend Technologies:

HTML, CSS, Tailwind CSS, Bootstrap, React.js, Responsive Web Design, Next.js

Backend Technologies:

Node.js, Express.js, RESTful APIs, Django

Databases:

MongoDB, MySQL

Development Areas:

Full Stack Web Development, API Integration, MERN Stack, UI/UX Development

Tools & Platforms:

Git, GitHub, Vs Code, Vercel, Figma

Core Computer Science:

Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Soft Skills:

Problem Solving, Quick Learner, Time Management, Adaptability, Team Collaboration
